MEDIC FIRST AID • LEADERSHIP • PLANT & LOGISTICS**

DISTANCE LEARNING, CLASSROOM LEARNING, E-LEARNING

About Us

INTERNATIONAL HSE COUNCIL IS AN ORGANIZATION PROVIDING INDEPENDENT AND PROFESSIONAL HEALTH & SAFETY TRAINING, CONSULTANCY AND ADVISORY SERVICES.

International HSE Council together with its team of international health & safety professionals offers an impressive 300 plus years of cumulative expertise, knowledge and experience in health, safety and environment within the construction, oil & gas, manufacturing, heavy industrial, aviation, banking & finance and hospitality sectors.

Learning with a Difference

In Dubai International HSE Council has modern and spacious training rooms all equipped with state of the art equipment. In other countries we make use of carefully selected local facilities which meet our high standards.

International HSE Council offers internationally recognized accredited courses such as NEBOSH International Diploma, NEBOSH International General Certificate, NEBOSH International Fire Safety Certificate, NEBOSH International Technical Certificate in Oil and Gas Operational Safety, NEBOSH Process Safety Management, NEBOSH Health & Safety at Work qualifications, IEMA Approved Introduction to Environmental Awareness, IOSH Managing Safety, IOSH Working Safely, IOSH Fire Warden, MEDIC First Aid Train the Trainer, MEDIC First Aid Basic and MEDIC First Aid Advanced.

Choices

International HSE Council believes in offering choices to our customers. Each will have their own needs based on time, work demands, geographical location and budgets. You now have options to choose a program that best suits you.

- Classroom learning
- Self Study
- A blend of self-study & classroom learning
- e-Learning

In-House Training Courses

Reduce costs and stretch your budget by having the training conducted within your premises. International HSE Council team of experts can design and tailor programs to suit your working environment and activities.

Consultancy & Advisory

With a team of specialist consultants, the International HSE Council offers a range of services to help improve the health and safety performance and efficiency of your organization. Our consultancy services include: safety strategy development, planning and review; safety management system audit and performance review; safety management systems development, enhancement and implementation; compliance and due diligence; workplace-based risk assessment; and risk management control programs.

NEBOSH

Accredited Programmes

NEBOSH Diplomas are globally recognised qualifications aimed at professional health and safety advisors and environmental practitioners.

NEBOSH

International Diploma

There is no prerequisite for this training however it is highly recommended to have a broad knowledge in the workplace health and safety. An International or a National General Certificate is suggested.

Who should attend this course?

This qualification is a perfect choice for anyone who aspires to make health and safety their career. Building upon the foundation of knowledge provided by the NEBOSH General Certificate, it is particularly relevant for:

- Health and safety professionals or those with aspirations to be one.
- People with health and safety responsibilities who want to gain an in-depth understanding.

Certification & Assessment

The assessments focus on the application of knowledge to

help you prepare for health and safety tasks you may face in the workplace:

Is this qualification recognised?

On successful completion of the qualification, the Diploma holder may apply for the International Institute of Risk and Safety Management (www.iirsm.org) as meeting their requirements for full membership (MIIRSM). United Kingdom professional health and safety bodies have a growing international reputation with a number of international branches being formed.

Holders of this qualification may use the designatory letters IDipNEBOSH after their name.

Unit	Assessment Format
ID1 – Know – workplace health and safety principles	Assignment – workplace-based tasks together with simulations, reflective activities and a research topic.
ID2 – Do – controlling workplace health issues	Scenario-based case study
ID3 – Do – controlling workplace safety issues	Scenario-based case study

NEBOSH

Accredited Programmes

NEBOSH

International General Certificate

The NEBOSH International General Certificate in Occupational Safety and Health is a globally recognised health and safety qualification.

Who should attend this course?

Managers, supervisors and employees based outside the UK who require a broad knowledge and understanding of health and safety principles and practices.

The qualification focuses on international standards and management systems, enabling candidates to effectively discharge workplace health and safety responsibilities in any employment sector, in all parts of the world.

The NEBOSH International General Certificate is also suitable for those embarking on a career in health and safety, providing a sound basis for progression on to the NEBOSH International Diploma.

Certification

On successful completion of the course you will receive a NEBOSH accredited certificate.

Is this qualification recognised?

The International General Certificate qualification meets the academic requirements for Associate membership (AIIRSM) of the International Institute of Risk and Safety Management (IIRSM).

Course Duration

9 days plus 1 day for Open Book Exam (OBE) and approximately 3 hours to complete the practical assessment.

Assessment

The IGC has two-unit assessments:

- one question paper
- one practical risk assessment

NEBOSH

Fire Safety Certificate

The content is designed to equip those studying it to undertake fire risk assessments in most, low risk workplaces. The syllabus is mapped to International standards and good practice from organizations such as the International Labour Organization (ILO), National Fire Protection Association (NFPA), International Code Council (ICC) and the Confederation of Fire Protection Association Europe (CFPA-Europe).

Upon successful completion of the certificate, delegates can apply for a membership with International Institute of Risk and Safety Management (IIRSM) as its qualification meets the academic requirements for Associate membership (AIIRSM) of the IIRSM.

Who should register for this course?

This qualification is designed for anyone who has fire safety responsibilities in a small to medium sized organisation. It provides the knowledge and understanding, when combined with relevant experience, to carry out an effective fire risk assessment, as well as embed good practice in the workplace.

Course Contents

FSC1

- Managing fire safety
- Principles of fire and explosion
- Fuel, oxygen and ignition sources and control measures
- Fire protection of buildings
- Safety of people in the event of fire

FSC2: Fire safety risk assessment

Course Duration and Assessment

The training is spread over 4 days plus 1 day for the (open book) written examination.

The FSC has two-unit assessments:

- one question paper (open book exam)
- one fire risk assessment

Elements 1 to 5 (FSC1) are assessed by a written exam lasting approx. 5 hours. Elements 5 (FSC2) is assessed by a practical assignment that should take around 3 hours to complete.

NEBOSH

International Technical Certificate in Oil and Gas Operational Safety

About the course

This qualification is specifically designed for people with safety responsibility in the oil and gas industry. The qualification focuses on international standards and management systems, enabling students to effectively discharge workplace safety responsibilities both onshore and offshore. The Certificate also highlights the importance of process safety management in the oil and gas industry.

There are no specific entry requirements for this qualification, however it is highly recommended that students have an existing underpinning knowledge of safety issues or have completed a NEBOSH Certificate level qualification previously.

Course Contents

Element 1: Health, Safety And Environmental Management In Context

- Learning from Incidents
- Hazards inherent in oil and gas
- Risk management techniques used in the oil and gas industries
- Safety cases and safety reports

Element 2: Hydrocarbon Process Safety 1

- Contractor management
- Process safety management (PSM)
- Role and purpose of a permit-to-work system
- Key principles of shift handover
- Plant operations and maintenance

Element 3: Hydrocarbon Process Safety 2

- Failure modes

- Safety critical equipment controls
- Safe storage of hydrocarbons
- Furnace and boiler operations

Element 4: Fire Protection And Emergency Response

- Fire and explosion risk in the oil and gas industries
- Emergency response

Element 5: Logistics And Transport Operations

- Marine transport
- Land transport

Examinations

The examination is a 2-hour written paper which consists of one 'long-answer' question and ten 'shortanswer' questions. All questions are compulsory.

Course Duration

5 Days plus one day for exam

NEBOSH

HSE Certificate in Process Safety Management

About the Course

The qualification is specifically designed for people with safety responsibility in process industries such as oil and gas, chemicals, plastics and pharmaceuticals. This qualification is designed to equip delegates with a broad understanding of the accepted principles and recognised industrial practices for the management of process risk. This will ensure that they can recognise and contribute to the control of process safety hazards.

Who should attend this course?

Ideal for managers, safety representatives and health and safety advisor working within the process industries.

There are no specific entry requirements for this qualification, however it is highly recommended that students have an existing underpinning knowledge of safety issues or have completed a NEBOSH Certification previously.

Course Contents

Element 1 : Process Safety Leadership

Element 2 : Management of Process Risk

Element 3 : Process Safety Hazard Control

Element 4 : Fire Protection And Emergency Response

Examinations

The examination is a 90 minute multi-choice examination which consists of 40 questions. There is no practical element to this qualification.

Course Duration

4 days plus one day for examination.

HSE Introduction to Incident Investigation

About the Course

The qualification is jointly developed by NEBOSH and Great Britain's Health and Safety Regulator, the Health and Safety Executive (HSE). In this one-day course, delegates will learn how to carry out systematic and thorough investigation of non-complex incidents so that similar incidents will not recur.

There are no specific entry requirements for this qualification, however it is recommended that students have an existing underpinning knowledge of safety issues.

Who should attend?

This qualification is for anyone who wants to carry out incident investigations effectively.

Employers, supervisors, HSE champions, union and safety representatives will benefit. Attending the course will enable you to:

- Independently investigate simple incidents
- Gather evidence including conducting witness interviews
- Produce an action plan to prevent a recurrence of an incident
- Contribute to team investigations for large scale incidents
- Positively impact the safety culture in your organisation

Course Contents

- Moral, legal and financial arguments for investigations
- Human and organisational factors that can contribute to an incident
- The process for investigating incidents
- Positive interview strategies and the barriers to successful interviews
- Advanced incident investigation techniques

Course Duration and Assessment

The course duration is one day. It includes a practical assessment at the end of the course.

Course Content

The content is delivered in an understandable and accessible way and will help you to:

- Gain an awareness of common workplace hazards so you can help to implement or maintain your organisation's health and safety management system
- Gain practical skills that can help keep yourself and others safe
- Apply the principles of risk assessment
- Have a positive impact on health and safety in your workplace.

Course Duration and Assessment

The training is spread over 3 days. After completing the course, you will be asked to complete a workplace health and safety review which:

- Considers how health and safety is managed, and how it could be done better
- Identifies health and safety issues, how they are controlled and if the risk can be reduced
- Select the most important issue for improvement
- This assessment is designed to test your ability to put into practice what you have learnt and, as it is carried out in the workplace, can add instant value to your organisation.

Once you have achieved a pass, a qualification parchment will be issued

HSE Award in Managing Risks and Risk Assessment at Work

About the course

The NEBOSH HSE Award in Managing Risks and Risk Assessment at Work is an introductory level qualification, developed in conjunction with the health and safety regulator for Great Britain, the Health and Safety Executive (HSE). It is structured around HSE's approach to controlling the risks caused by workplace hazards.

Who should register for this course?

Anyone involved in managing workplace health and safety risks including those who undertake risk assessments. The content will be particularly useful to employers, managers, supervisors, HSE champions and union and health and safety representatives.

Course Contents

At the end of the course, you will learn how to:

- Identify hazards and be aware of some of the resources that can help
- Assess risks in low to medium risk premises using simple HSE tools
- Evaluate risks in a proportionate and sensible manner
- Identify suitable control measures

This qualification will help you:

- Develop straightforward practical skills to manage workplace risks something all employers need
- Build confidence in your risk assessment capabilities
- Contribute to the creation of a safer and healthier workplace as soon as you return to work

NEBOSH

Certificate in Manual Handling Risk Assessment

About the course

Manual handling is one of the main causes of musculoskeletal disorders. This qualification aims to help you address this, by providing the knowledge and tools required to identify manual handling risks and more importantly, prioritise controls to protect workers.

Who should register for this course?

Anyone involved in assessing the impact of manual handling activities in the workplace including:

- Health and safety professionals
- Workplace champions
- Employee representatives
- Occupational health practitioners.

Course Contents

The content is delivered in an understandable and accessible way and will help you to:

- Principles of manual handling
- Managing manual handling risk: Identification of manual handling risk
- Managing manual handling risk: Control of risk

Distance Learning Duration and Exam Arrangements:

Students should aim to complete their studies within six months of enrolling for the course. After completing the course, a practical assessment is completed.

After watching a video of a workplace scenario, you will be asked to complete a manual handling risk assessment using HSE tools and templates you will have learnt about through your studies.

Once you have achieved a pass, a qualification parchment will be issued.

Course Duration and Assessment

The training will be delivered in 1 day. A practical assessment is completed at the end of the course. After watching a video of a workplace scenario, you will be asked to complete a manual handling risk assessment using HSE tools and templates you will have learnt about through your studies.

Once you have achieved a pass, a qualification parchment will be issued.

Working with Wellbeing

About the course

Working with Wellbeing is an introductory level qualification that looks at workplace wellbeing at both an individual and organisational level. This qualification is designed for those who wish to gain a greater understanding of workplace wellbeing and the factors which affect it. The qualification will also equip learners with the knowledge and understanding required to positively influence and evaluate levels of wellbeing in the workplace.

Who should register for this course?

If you are looking to have a positive influence on wellbeing in your workplace, this qualification is a great choice for you. It is particularly relevant to HR specialists, Health and Safety professionals and those with people management responsibilities.

Course Content

- Foundations of wellbeing
- The branches of wellbeing; benefits and what this means in practice
- Interventions in the workplace

Course Duration and Assessment

- This is a one-day training.
- Unit WEL1 is assessed by a practical assignment that should take around 1 hour to complete.

IIRSM Certificate in Managing Risk

E - Learning

About the course

Effective risk management helps ensure better decisions are made that will protect people, organisations, and reputations.

On completion of this course, you will gain knowledge about:

- The principles of risk and risk management
- The risk management process and framework based on ISO 31000
- The relationship between psychology and decision-making
- The environment in which an organisation operates, identifying potential risks and opportunities
- The relationship between risk management, business continuity, crisis management and organisational resilience

Who should register for this course?

Anyone who wants to be able to identify, evaluate, and manage organisational risks and understand their impacts. It is particularly relevant for risk professionals looking to gain a broader view of risk beyond a specialism such as health and safety, quality, or business continuity.

Course Contents

Element 1 – Principles of risk and risk management:

- Understand the principles of risk and risk management
- Source and challenge the validity of risk information
- Understand the impact of psychology on decision making

Element 2 – The risk management process

- Apply the risk management process to manage risk effectively

Element 3 – The risk management framework

- Understand how to integrate the risk management framework into your organization

Workbook

The NEBOSH IIRSM Certificate in Managing Risk eLearning course provides everything you need to complete your studies and prepare for your assessment. The course fee is NOT inclusive of a workbook however learners can separately purchase the hard copy workbook directly from NEBOSH and/or the ebook via Learning Partner. This is optional rather than essential purchase.

Assessment

To achieve the qualification, you must complete and pass the Unit MAR1 assessment.

- The assessment is an onscreen multiple-choice examination for one-hour.
- After you have completed the e-Learning course, you may take the assessment at any time.
- You will receive your results immediately.
- You have two attempts at the assessment.

If you achieved a Pass, you are considered to have completed the qualification and an e-certificate will be issued instantly.

NEBOSH SELF STUDY

Distance learning is an affordable and flexible learning option. Best of all, this option is available to you anywhere in the world.

Upon enrolling, you will receive a comprehensive study package.

- Course books specially designed for the international market
- Mock exam papers
- Unlimited advice and support via email or phone
- Feedback and guidance on your mock exams and project paper
- NEBOSH International General Certificate students are welcome to attend two days of revision classes in Dubai only
- NEBOSH International Diploma students are welcome to attend two days of training in any of the classes per Unit (ID1, ID2, ID3)

Accredited Professional Diploma Occupational Health & Safety (Arabic and English)

The UK accredited Professional Diploma in Occupational Health and Safety is designed for individuals aspiring to have a career in health and safety. The program is specially designed to provide individuals with the expertise required to follow a career as a Health and Safety practitioner.

The Professional Diploma is unique in that unlike other HSE programs it has a specific unit on security management. The other unique feature is that it has both international regulations, and UAE Federal HSE regulations enabling HSE practitioners to be well equipped to deal with the challenges of working and enforcing the HSE regulations in a diverse workplace.

Course Structure

There are two modes of study.

- 1) Distance Learning
This is a self-study option which gives students the flexibility to study at their own pace.
- 2) Blended learning
This is a combination of 14 classroom sessions and self-study.

The Professional Diploma consists of 4 Units

UNIT	TITLE
PD1	Health & Safety Management
PD2	Common Hazards and Fire Safety
PD3	Practical Assignment

Course Assessment

PDs 1 & 2: Each Unit examination consists of 50 multiple choice questions.

PD 3: Students are required to submit a written assignment set by the tutor.

ONLINE OPITO

Approved Courses

International Minimum Industry Safety Training **IMIST**

IMIST is the International version of the Minimum Industry Safety Training, also an OPITO-approved course, developed for the global standard for Health and Safety. The course covers all job roles for personnel working in the Oil and Gas Industry across the world.

The course is available in 13 languages; US & UK English, Arabic, Hindi, Bahasa Malaysian, French, Vietnamese, Thai, Indonesian, Russian, Kazakh, Farsi and Danish.

The nine modules covered in IMIST are:

- Introduction to the Hazardous Environment
- Working Safely
- Understanding the Risk Assessment Process
- Tasks that Require a Permit to Work
- Personal Responsibility in Maintaining Asset Integrity
- Using Manual Handling Techniques Every Day
- Controlling the Use of Hazardous Substances
- Knowledge and Processes of Working at Height
- Being Aware of Mechanical Lifting Activities

The IMIST standard ensures that workers have the necessary safety awareness and training to reduce risk and ultimately reduce the number of incidents. This interactive e-learning training programme works by assessing the safety knowledge of an oil and gas worker during a random sequence of assessment questions.

Authorised Gas Testing

This OPITO-approved course will provide you with the knowledge and understanding to enable you to work safely when performing tests for oxygen, flammable and toxic gases.

It includes testing in confined spaces, relevant legislative control, atmosphere measuring and monitoring equipment, gas testing in confined spaces and interpreting and documenting results.

The tasks authorised gas testers are required to undertake may vary depending on the workplace operation at the time. The tasks also vary in complexity and responsibility. Therefore, the AGT role has been split into three levels.

Level 1 is required for those involved with performing a test for oxygen, flammable and toxic gases up to and including working in confined spaces.

AGT Level 2 is required for those involved with testing for flammable gas in preparation for hot work.

AGT Level 3 is required for those who provide safety watch duties by the ongoing monitoring of a hot work site.

IOSH

Managing Safely (English & Arabic)

This IOSH Managing Safely course is designed for non-health and safety personnel who have to manage risk and resources. It is also suitable for those with responsibility for health & safety. It is designed to provide an overview on health & safety based on risk-based approach to prevent accidents in the workplace.

Who should attend this course?

Managers, supervisors and any individual with responsibilities in health & safety in any sector and any organisation. It is designed to get managers up to speed on the practical actions they need to take to handle health and safety in their teams.

What the course covers

- Introducing Managing safely
- Assessing risks
- Controlling risks
- Understanding your responsibilities
- Identifying hazards
- Investigating accidents and incidents
- Measuring performance

Assessment

- The assessment consists of
- Multiple choice exam
 - Project assignment

Certification

On successful completion of the IOSH Managing Safely course candidates will be awarded the accredited IOSH Managing Safely certificate.

IEMA Introduction to Environmental Awareness

About the course

This one day course provides an introduction to understanding how the earth works, how humans are part of it, what it means to your organisation and identifying actions to take. Sustainable business practices not only save costs but also build brand and other "non-financial" value, improves access to capital, fosters innovation and strengthens competitive advantage. The business and your staff benefit from sound environmental knowledge.

Who should register for this course?

This course is suitable for anybody with an interest and responsibility for environmental issues. From operator through to senior manager level.

This course is designed "to turn the lights on" regarding the risks and opportunities in an organisation's environmental performance.

- Overview of Earth's natural cycles
- Sustainable development
- The business case
- Environmental legislation
- Business impacts and actions
- Measuring performance
- Protecting our environment

Course Duration and Assessment

The course duration is one day. Successful candidates will be awarded an IEMA certificate.

Medic First Aid Courses

Medic First Aid (English & Arabic)

Train the Trainer Course

The MEDIC FIRST AID Train the Trainer course prepares candidates to become MEDIC First Aid Instructors.

The training process includes practicing the step by step requirements for delivery of a one day basic MEDIC First Aid Course. This is particularly useful for individuals who wish to become MEDIC First Aid Instructors or those wishing to do a refresher training.

Course Contents

- The MEDIC FIRST AID Difference
- MEDIC FIRST AID Training Philosophies
- Medical Source Authorities
- MEDIC FIRST AID's Integrated Learning Model
- Adult Learning Principles
- MEDIC FIRST AID Training Programs
- Role of the Instructor
- MEDIC FIRST AID Training Materials
- Introduction to the Instructor Guide
- Using Instructional Pages

- Showing Program Video Segments
- Referring to Student Guide Pages
- Performing Real-Time Demonstrations
- Facilitating a Small-Group Practice
- Observing Reasonable Performance
- Accommodating Slow Learners or Difficult Students
- Facilitating Talk-Through Scenarios
- Facilitating Performance Evaluations
- Facilitating Written Knowledge Reviews

Certification

On successful completion of the course participants will receive an accredited MEDIC First Aid International Certificate.

Recognition Period

1 year

Accredited General Train The Trainer

General Train the Trainer

The Train the Trainer programme is designed to a very practical level, aimed at developing awareness and understanding of and reflection on issues relating to techniques & styles in training/ presentation at different levels of interaction.

The delivery technique can range from training to informal "talks" at staff meetings, to presenting lengthy, complex, critical information to an audience in an auditorium. This program is aimed at encouraging individuals to take a constructively critical approach to developing their personal teaching and presentation skills.

The three-day intensive course is very much hands-on and delivered on a practical level, requiring attendees to evaluate their own skills & resources and to identify strategies for continuous self- assessment and development.

Course Objectives:

By the end of the course, participants will be able to :

- Understand the structure of preparation - audience,

venue, pre & post presentation

- Identify and adapt to audience styles and attitudes
- Make appropriate use of training facilities and resources
- Identify strategies to maximise reception and understanding of target knowledge, skills, Attitudes and behaviours
- Ensure that the learning intervention addresses specific individual and/or group needs
- Provide appropriate, effective and constructive feed back
- Use techniques to maintain control of and motivate groups and individuals
- Deal with audience reactions
- Have basic understanding of body language
- Effectively supervise, delegate, manage time, coach rather than tell, neutralize conflict and promote team spirit.

Course Duration

The duration is 3 days

DNV GL

ISO AND RISK MANAGEMENT

DNV GL is an independent foundation with the purpose of safeguarding life, property, and the environment. Headquartered in Oslo, Norway, DNV GL has worked internationally since 1867 and has established approximately 300 offices in 100 countries. As a knowledge-based company, its prime assets are the creativity, knowledge, and expertise of our 9,000 employees from more than 85 different nations. International HSE Council in association with DNV GL is pleased to offer the following internationally recognized accredited programs.

ISO 9001:2015-Quality Management System

Quality management system (ISO 9001:2015) provide a framework for focus on customer and product requirements, process performance and effectiveness with emphasis on continual improvement and objective measurement.

Integrated Management System

Effective Integrated Management Systems (IMSS) take into consideration all activities that have an effect on the business and are implemented at all levels within an organization regardless of its size or function. A management system, be it quality, health & safety, environmental should operate seamlessly across all components as part of the day-to-day business functioning.

Occupational Health And Safety Management Systems Auditor/lead Auditor Course Based On

ISO 45001:2018 (CQI IRCA Certified Course ID: 1877)

This course is designed to develop a clear understanding of safety management in the modern era and provide those involved in audit conduct and management with the skills to fulfil their role.

ISO 45001 OHSMS Lead Auditor Course (CQI IRCA)

This course is designed to provide participants with the knowledge and skills required to perform first, second and third-party audits of management systems against the requirements of the ISO 45001:2018, in accordance with the guidance given in the ISO 19011 for first and second party audits as well as the requirements of the ISO 17021 for third party audits.

Who should attend?

This course is recommended for anyone who is planning to perform internal audits/preparing to become an external auditor of OHSMS management system as per ISO 45001 standard.

ISO 45001 Auditors Migration Course (CQI IRCA)

This migration training course pack provides you the knowledge of the changes on the new standard ISO 45001 as compared to OHSAS 18001 and the skills required to audit against the new standard. It is recommended for professionals working in organizations certified to OHSAS 18001 standard that has been revised.

ISO 9001:2015 QMS Lead Auditor Course (CQI IRCA)

This course is designed to provide participants with the knowledge and skills required to perform first, second and third-party audits of management systems against the requirements of the ISO 9001:2015, in accordance with the guidance given in the ISO19011 for first and second party audits as well as the requirements of the ISO17021 for third-party audits.

Who should attend?

Anyone intending to perform audits of a quality management system. Note that, while this course is applicable to first, second, and third-party audits, this course is taught from the third party (Certification Body) perspective. An attendee can both start their journey down the third-party auditor route, and/or have an understanding of what third party auditors look for.

Integrated Management System Internal Auditor Course (ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018)

To enable participants to gain a practical knowledge of how to seek compliance & audit integrated Quality, Environment & Occupational Health and Safety Management systems to comply with the requirements as per ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018 and to effectively participate in the implementation of requirements.

Accredited Practical Courses

Emergency Preparedness

In all cases where there is potential serious harm to people at work and affected by work, emergency preparedness by way of proper planning and testing will reduce the consequences of on-site emergencies and help to mitigate the effects. On this two day training, workers will learn how to be prepared and correctly respond during an emergency.

Confined Space Entry And Rescue

This two day course is physical and will be probably more physical than the delegate encounters in their normal daily workplace. Participants will be taught on the use of the tripod/quad pod plus either winch or retractable retrievable fall arrest block as a means of access to confined spaces, plus rescue and emergency evacuation from either a horizontal or vertical confined space. This program is only recommended for participants who are physically fit and healthy.

Fire fighting

This one day program is a combination of theory and practical training on fire prevention and fire fighting techniques. The course will take the participants through a range of fire related topics; principles of fire triangle, location of fire fighting equipment and

escape routes, fire chemistry and ignition sources, fire hazards, flammable materials and fire spread, need for vigilance and readiness for emergency response, fire/smoke detection and alarm systems, portable fire fighting equipment, PPE & RPE. The afternoon practical session includes using hand-held firefighting equipment on real fires. Every participant takes part in using the extinguishers.

Fire Warden

This course is designed to help participants understand:

- Evacuation and assembly principles and procedures
- Fire, bomb threat, and other emergencies and their
- Effects on the workplace
- Fire equipment and correct method of fighting a fire
- Efficient evacuation of the workplace with consideration of special people who may require additional assistance
